

ABOUT US

TOXIMEC SAL is a leading provider of hazardous waste management and environmental services, operating as part of the MEC Holding network. Headquartered in Lebanon, we specialize in the safe and responsible handling, treatment and export of hazardous waste, offering tailored solutions across sectors.

With international expertise and a commitment to safety, TOXIMEC plays a vital role in onsite hazardous material management. We address a wide spectrum of dangerous waste types, including:

Pesticides, PCBs (Polychlorinated Biphenyls)
Contaminated soils, Hazardous industrial waste, Asbestos, Petroleum waste, Chemical waste, Halon gas, Pharmaceutical waste, Medical waste, Radioactive waste, Oil spills, Our approach goes beyond waste removal, we offer customized services and advanced training programs designed to build strong safety cultures within our clients' organizations. Training covers essential topics such as hazardous material storage, medical waste disposal, emergency response, and evacuation procedures.

TRUST

At TOXIMEC, trust is the foundation of every partnership. Whether working with multinational industries, local municipalities, or humanitarian organizations, we deliver reliable, transparent, and fully compliant solutions that meet the highest international standards. We collaborate actively with private companies, public institutions, NGOs, and development agencies to respond to environmental challenges with professionalism, agility and responsibility.
